/101 cont./

175 648 Nineteen years later, in 1562, Domingo Lozano made a new attempt to exploit the rich silver mines of Timaná and La Plata. He was obliged to withdraw, however, only to return the next year with reinforced troops. He founded the city of San Vicente de Paez, but only two months later, in an attack by the Paez on the city founded by him, he lost his life. An auxiliary body of troops advancing in forced marches from Popayán was also completely destroyed. After this new expulsion of the conquerors, the Paez allied themselves with the Pijao, who had destroyed Neiva in 1569. Together they attacked and plundered the silver mines of the city of La Plata in 1577, killed all the inhabitants, and set fire to the houses.

As a result of these unfavorable reports, the Spanish king energetically ordered the "pacification of the province," which from 1605-1608 was carried out so successfully that finally the troops could not find any Indios to fight or houses to plunder. In 1605, after the lost battle of Itaibe, the Paez retreated to the region of their inaccessible mountains still occupied by them today. Their western neighbors, the Guanaca, allied themselves with the Spaniards, and the latter put through their territory the [997] connecting road from /102/ Popayán to Bogotá. In 1613 the Jesuits set up the first mission station and a rest station for travelers [164] in the town of Guanacas. In 1790 most of the Guanaca fell ● [734] victim to an introduced smallpox epidemic. The survivors withdrew to the present Inzá, where they were absorbed among the colonists. Nothing has remained of their language.

175 648 797 The Paez continued to defend their country against the Spaniards and against missionization and, by their sudden attacks, made the road to Bogotá never quite safe. And then in the subequent period the Spaniards had little interest in missionizing and civilizing the Paez. After the Guanacas station, only one 648 mission was founded in Tálaga. / Because of the location of the 171 individual communities, enclosed by high mountain ranges, a 175 few villages were able to remain uninfluenced by Spanish civiliza- [36] tion for quite a long time. Later the authorities supported the establishment of native self-government, the cabildo /see the

/282 cont./

of the patient with water to which sũ̯ and yakũma have been added as medicinal herbs, so that he will now be completely freed of the pest. Finally the teyu asks Thunder to prevent anyone from uncovering this hole in which the dangerous pest is buried. He further asks Thunder to help him in subsequent treatments of the sick later on. The patient is told that the signs are favorable, and he is again enjoined neither to use the medicines of the whites nor ever to pass this hole containing the pest.

Besides these two most important shamanistic ceremonies, the treatment of the sick and the purification of the relatives after a burial, the shaman's ability and his magical, supernatural powers are also called upon for preventive ceremonies and acts. This is particularly necessary if epidemics of disease -- smallpox, whooping cough -- occur in the village or in a family. In the first instance, the cabildo asks a shaman who is known to be able to speak with Thunder to conduct the proper protective ceremonies; in the latter instance, /283/ the oldest member of the afflicted family asks him. First a pig must be killed for this. A piece is cut from all the body organs on the left side, and everything is put into a new fiber bag. The shaman and the cabildo then set out in the afternoon for the lagoon in which Thunder is believed to live, in order to hand over to him the bag with the pieces of meat, with the request to avert the epidemic. During this time the women remaining behind have been preparing the rest of the meat for a meal, which, however, is eaten jointly only when, after twelve hours, the shaman and cabildo return from their ceremony.

For several cases of illness and death in one family the help of a good shaman is likewise required. The pest is generally regarded as the cause of these cases of death afflicting only one family, though according to a report by S. Bernal Villa, the deceased and angry members of the family are held responsible for this. In this case the eldest of the family provides brandy, coca, and tobacco, calls together the family members, and asks the shaman to come. The latter offers the angry ancestor spirits a fat pig that has first been tied in front of the house for a whole night, while the shaman during this time speaks to the spirits about whether they will accept the offering.

132 gives rise to cold local winds that blow through the valley of the Páez, affecting chiefly the areas of Vitoncó, Suin, Chinas, San José, Mosoco, and also the parcialidad /a territorial division/ of Calderas itself. The variation in temperature is noticeable in these zones sometimes having hot days and very cold nights. Nebulosity is almost constant, especially in the northern zones.

241 Economy.--The topographic and climatic characteristics permit the cultivation of various plants, such as maize, beans, bananas, sugar cane, yuca, arracacha, and gourds in the temperate zones, and in the cold ones potatoes, maize, ullucos, [433] beans, gourds, and cabbage. The produce barely leaves a [439] surplus for trade with the parcialidades and urban centers of [438] Belalcázar, Inzá, and Valencia. The potato crops of Mosoco, Vitoncó, and San José serve for an active trade with the Paez of the western slope of the cordillera, across the Páramo de Moras.

433 Coffee and the production of panela are important lines
245 in the economy of the colonists and also of numerous groups
249 of acculturated natives. The coffee of Tierradentro is con-
177 sidered one of the best in the country, owing to the quality and mildness of the bean.

23 /285/ The raising of livestock flourishes among the civilized
437 groups. For the natives it serves for maintaining a barter trade with their neighbors, the white and mestizo colonists.

311 On the whole, native production is relatively scant,
433 giving rise to times of "hambruna" /ravenous hunger/ when
[731] the summers or winters are rather harsh. The workable land lies in the small plains and valleys of rivers and streams, on the alluvial terraces, and on the plateaus. Comparing the size of Tierradentro with that of its arable land, the latter appears scant, a problem that is aggravated by the increase in population and the habitual burning.

101 Population.--Tierradentro is the country of the Paez,
36 who at the time of the Conquest were settled to the north of

824 The plants marked with an asterisk were identified by the
[128] Herbario Nal. Colombiano, in particular by Dr. Jesús M.
[137] Idrobo.

[127] For the others, we were guided by the work, Plantas Utiles de Colombia /Useful Plants of Colombia/, by Dr. E. Pérez Arbeláez, published by the Imprenta Nacional de Bogotá in 1947.

75 The té eu and the community. In every culture, medicine
182 performs an eminently humanitarian function. Its nature is
171 sociological. No matter what its methods may be, its purpose is to save human lives. It combats illness, but also prevents it.

75 Among the Paez, medicine cures and prevents. The
182 community and the family perform special ceremonies intended to achieve these two purposes of medicine.

755 When the pest (epidemic) has spread through the com-
*756 munity, threatening its subsistence, the authorities (cabildo)
182 invite the curer to conjure away the danger by performing the
●[734] wé ká.

When the illness prevails in a single family, markedly decreasing its members, the eldest invites the curer to perform
[765] the ut ká. After every burial the people must remove the ptans
[783] from their bodies and from the house where the death occurred. The curer is the only one who can do this.

241 The first fruits of plantings made on new lands not culti-
*756 vated before cannot be consumed until the curer has performed
783 the cleansing ceremonies. Thus, it is the curer who defends
182 the family -- preservation of the species -- who purifies the
789 harvests -- preservation of the individual -- and who also defends the community, warding off by means of his conjurations
*756 the epidemics and the individuals who threaten it. In 1952,
789 before an imminent attack by subversive armed groups on the
182 Parcialidad of Santa Rosa, the curer warded it off with maní de montaña /literally, "montaña peanut"/, chewed and blown on the path by which they were to come.

/241 cont./

731 Since the ceremonies mentioned have some differential
755 aspects, we shall look at them in detail.
756 Wé ká (pest-send). When the pest appears in a community,
783 smallpox, whooping cough, which are rapidly finishing off /242/ the population, the cabildo takes the initiative for conjuring away the danger. It requests from the people coca, tobacco, and aguardiente, they arranges for a pig and invite a famous curer who can talk to Thunder. From the edge of a lagoon, by means of good remedies and the help of Thunder, the curer must ward off the pest.

[782] They sacrifice the pig. From its left side they take a small piece from all the organs and place them in a new pouch. They gather glowworms (Echis) and go to the lagoon. The retinue made up of the curer and the cabildo leaves at three in the afternoon, and twelve hours later they will be back at the point of departure. Meanwhile, the women have been busy preparing the meat, without eating a single piece of it. They have not slept either, for they have an obligation to wait for the retinue wide-awake. When they arrive, the meat and stew are distributed, and the chicha and aguardiente are drunk. With this the people are relieved and the pest is banished from the community.

755 Ut ká ("dirt"-send). This is exclusively a family affair.
756 When the members of a family are dying, there is ptans, says
783 an informant, while another one thinks, with more reason, that it is the angry spirits of the dead who want to finish off the family. In such a case, the eldest of the survivors arranges for coca, aguardiente, and tobacco, gathers the family members together, and calls the curer.

[787] The latter divines up to eight or ten nights. He captures up to 12 glowworms. He asks for a castrated and fat pig. He ties it up for an entire night and divines as to whether the souls of the dead members of the family will accept it. At dawn he orders it killed. The slaughterers, the chicha-makers, the carriers of the sugar cane, and the women cooks are not

* /252 cont./
756 They are very tractable, friendly, and in our cultural
156 terms we would say that they have a marvelous gift for dealing
157 with people.

[886] When they grow old, they cease to perceive the signs.
[787] They believe that when a curer dies, his death is heralded
[821] by thunder. They live in permanent tension to counter the
[763] attacks of sorcerers. At the slightest symptom, they go to their kachí to divine and to take the appropriate precautions. They eat little so as not to sleep at night; they do not suffer from insomnia. They refrain from sexual relations and from ají during their treatments.

●[734] They attract the entire concern of the community when epidemics occur. The true curers, those conscious of their profession, are temperate, engrossed in the fight against sickness, and of a kindly disposition. They inspire trust and do not show egoism; they readily explain the secrets of their profession.

* 756 Competition among the Té eu. Some rivalry seems to
578 exist among the curers, and the natives even list the zones of action of the curers. It is certain that a curer will boast of having overpowered another in the latter's own area of practice. A curer from Santa Rosa tells how he overpowered a colleague.

755 The informant went to give treatments to a white patient
* 756 at Alto de Atarraya. There he found another curer who was
578 giving remedies that were useless. The patient provided for them very well, with abundant chicha and aguardiente. The new arrival drank with care. His colleague had already eaten the pork, but the patient was following /253/ him. The two curers prepared to fight. The new curer took his tama and his coca and at nine at night prepared to divine. His assisting spirit told him that the other one had given false remedies. Thus he had to learn the effective remedies. He discovered that the harm had been done by a native servant girl, along with some neighbors who did not like him. At once he called in the cook in order to question her and make sure of what she had

?:Hernández de Alba E-5,4(no date) 1946 SC15 Paez SC15

The King of Spain, receiving word of the troubles in this region, ordered Don Juan de Borja, his Governor at Santa Fé, to carry out the "pacification of the province," meaning the extermination of its inhabitants. The decisive war started in Chaparral in 1605 and ended in 1608 when a Spanish witness wrote of this territory, where the *Páez* had remained free for so many years, that the provinces "were so desolated that the troops could not find Indians to fight, houses to plunder, or roots or grain to eat, and, if some Indian remained, instead of daring to plant boldly, he sowed four handfuls of grain here, two more there in the shadows and cover of the trees . . . they went about harrassed, thin, and emaciated until life was ended, for the soldiers saw corpses of people dead of hunger or sickness at every step" (Simón, 1882–92, Septima Noticia, ch. 49, vol. 5, pp. 314–15). A document in the ecclesiastical archives of Páez, dated July 17, 1638, states that in the lands adjoining the *Páez* there lived a *Pijao* Indian named Ambrosio, who had said that Captain Andrés de Zúñiga could now well enjoy this country because there were *Pijao* but not *Páez* Indians in it and because the *Pijao* saw themselves doomed and the land had no proprietor.

The *Guanacas*, who, because their chief was an enemy of the *Páez* chief, had allied themselves with the Spaniards in order to attack the *Páez*, were the first to surrender and join a Spanish colony. The first road between Popayán and Santa Fé passed through their territory, where the Spaniards established a hostelry for traders. This district was given to the Jesuits, who established the Church of Guanacas and, later, a town of the same name. But the Indians felt another lethal force of European origin—disease which they were unable to withstand. In 1790, a smallpox epidemic so reduced them that they abandoned their town, and the few survivors retired to the narrow mesa, where the modern town of Inza is situated. Here they gradually disappeared altogether.

The *Páez* continued to resist and defend their lands against Spanish missionization, so that the road to Guanaca never became secure. The extinction of the *Pijao*, the lack of important quantities of gold in the area, and the difficulty of the terrain, which was such that the Chronicler Pedro de Aguado said "to travel through *Páez* territory is to go up and down," caused the Spaniards to abandon interest in dominating these peoples. They were content to establish the Guanacas mission, and, a little later, the parish of Tálaga. Subsequently, as these Indians, who were isolated in their high mountains, were allowed to retain their customs and beliefs without interference, they did not protest when small groups of Whites peacefully occupied certain places in their lands.

Thus began the true Colonial Period for those tribes which survived the wars of the Conquest. The encomienda system was inaugurated,
